a place of mind

ROOM:LIB 125
A/V QUICKGUIDE

Displaying an electronic device on the large displays:

Press ‘POWER’ on remote-control to turn both large screens ‘*on*’.
(you must point remote-control directly at screens)

Below the screens, near the cabinet, there is one VGA cable and one HDMI cable.

Choose the correct cable for your device and connect it.

Once the cable is connected, your device should be viewable on the large displays immediately.

You cannot display two separate devices at the same time.

Please turn the displays off when finished

Please replace the cables on the cable hooks provided.
